DETAILED ACTION

(Including an Examiner's Amendment)

Response to Arguments

Applicant's arguments filed 2/22/05 have been fully considered and are deemed persuasive. Applicant primarily argues that the Noneman reference state that an acknowledgment signal informs the source that sufficient capacity exists to support the peak transmission rate and this is not the same as information on reception quality being sent back to the source station where the base or source station changes the rate based solely on this received information. With a priority date going back to 4/17/98, applicant's claim language distinguishes applicant's invention from the prior art.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney James Ledbetter on 6/10/05. The application has been amended as follows:

IN THE CLAIMS

Claim 35 has been cancelled.

Allowable Subject Matter

Claims 31-34 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding the claims, the examiner is in agreement with applicant's arguments as to the reasons for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
